Mar 6, 2563 BE Heidenhain post processor for Solidcam.. The new Heidenhain TNC 5X Mill post processor is now available for users with HEIDENHAIN TNC controls and Mastercam® CAD/CAM software. Download SOLIDWORKS CAM and CAMWorks post processors for your CNC machines. We create and support post. Heidenhain-Itmc530 Mill. Mill. Heidenhain. Post Processor Heidenhain 530 Per Solidcam thanks in advance. A: There is a commercial product named Post Processor Helix TP (from Heidelberg). It can be used in Solidworks. There are some more links: A: The tools SolidWorks offers are far too limited to perform this task, but there is an add-on for SolidWorks called the SolidWorks Edit Module. This will let you perform basic edits to your model. It does not have a feature for automation but is free. This is the module that you need to use: Open the file Select Edit from the menu bar Select the module: In this example I am editing a feature Select Edit from the module menu Now you have the capability to select options for the Feature and Edit the results Saturday, March 16, 2012 Who is behind the name "Blue Pearl"? Who is behind the name "Blue Pearl"? It's a very beautiful name for a product made from resin, therefore it would be something with a nice, pastel blue color, like purple or lilac... Then I noticed that the website of the designer of the mentioned resin products is named Blue Pearl, and the very first word I see at the top is... "Blue". So what am I saying? Well, this is the only name of the company responsible for the production and sale of these products, is called "Blue Pearl".... Right on the top, at the
